

WATER RESOURCES RESEARCH GRANT PROPOSAL

Project ID: 2002MI7B

Title: Information Dissemination and Technology Transfer Training Programs

Project Type: Research

Focus Categories: Education, Groundwater, Surface Water

Keywords: Water Quality; Watershed Management; Macroinvertebrates; Lakescaping; Water Chemistry; Monitoring; GIS

Start Date: 03/01/2003

End Date: 02/28/2004

Federal Funds Requested: \$20000.00

Matching Funds: \$41165.00

Congressional District: Eighth

Principal Investigators: Wolfson, Lois G (Michigan State University)

Abstract: An effective information dissemination program continues to be an essential element for transferring research and information to a wide audience. Information on water related fields is being generated at a rapid rate and must be transferred to a diverse audience in a timely manner. Further, the information must be science based and to address this information transfer gap in the water related fields, the Institute of Water Research has developed and expanded upon its information dissemination and training program. The objectives are to develop and present educational programs designed to increase the public's awareness and appreciation of the water quality and quantity problems in Michigan and to stress the economic tradeoffs required to solve water related problems. These programs are offered in the form of conferences, seminars, training workshops, computer models, web-based programs, and printed material.
